Index to

Aero/Space Engineering, Volume 18

January–December, 1959

Subject Index (See also Author Index, page 118)

	Month	Page
ACCESSORIES & COMPONENTS		
Secondary Power in Advanced Flight Vehicles, Kelso Jones	*Aug.*	54
AERODYNAMICS		
Application of the Hypersonic Similarity Rule to Conical Flow of Dissociated Air, Mary F. Romig	*Mar.*	56
Blown Flap System for STOL Performance—Weight Considerations, Milton Schwartzberg	*Mar.*	48
The Cone-Sphere in Hypersonic Helium Above Mach 20, Robert H. Johnson	*Feb.*	30
Microschlieren—A Technique for the Study of Details in Compressible Flow, Walter S. Bradfield and Joseph J. Sheppard	*May*	37
A Quantitative Analysis of the Characteristics and Limitations of Aerodynamic Flight Within the Atmosphere. Part I—Characteristics, William Chester Walter	*Aug.*	43
A Quantitative Analysis of the Characteristics and Limitations of Aerodynamic Flight Within the Atmosphere. Part II—Limitations, William Chester Walter	*Sept.*	63
Some Experimental Techniques in Mass Transfer Cooling, Bernard M. Leadon	*Oct.*	28
Three-Dimensional Satellite Orbits With Emphasis on Re-Entry Dynamics and Oblateness Effects, Jack N. Nielsen	*Apr.*	60
A Wind-Tunnel Investigation of Some Aspects of the Supersonic Boom, Harry W. Carlson	*July*	38
Wind-Tunnel Tests of Shrouded Propellers and Their Application, Robert K. Wattson and Vernon O. Hoehne	*July*	58
AIR TRANSPORT		
Aircraft Growth—Local Transport Category, Winfield H. Arata, Jr.	*Nov.*	42
The Case for the Supersonic Transport, Hall Hibbard and Robert A. Bailey	*July*	32
Extending Capabilities of Escape and Aerial Delivery Systems, Fred B. Stencel	*Jan.*	47
Transport Aircraft Developments, Harold Hoekstra	*May*	41
AVIATION & SPACE MEDICINE		
Man-Machine Integration in Space Vehicles, Comdr. George W. Hoover, USN	*Feb.*	54
CONTROL		
Handling Qualities and Pilot Dynamics, Charles B. Westbrook and Duane T. McRuer	*May*	26
The Pilot's Role in Space Flight, Charles B. Westbrook	*Nov.*	51
EDITORIALS		
The Anglo-American Conferences	*Oct.*	27
An Appreciation—and a Promise	*July*	30
Appropriate Award	*Feb.*	20
Charting the Future	*May*	25
Engineering and Science in Space, H. Guyford Stever	*Sept.*	37
Fait Accompli	*Nov.*	37
A Few "Von Kármánisms," Theodore von Kármán	*June*	22
The 5-Year Look—A Progress Report	*Jan.*	22
Let's Look at the Record	*Dec.*	24
Let's Start the Difficult Now!, Vice Adm. Selden B. Spangler, USN (Ret.)	*Mar.*	46
New Constitution	*Aug.*	28
Some Remarks on the National Space Program, Louis G. Dunn	*Apr.*	33
ELECTRONICS & ELECTRICAL EQUIPMENT		
Electrical Primary Flight-Control Systems, F. Gene Keyt	*July*	53
Electronic and Communications Aspects of Space Flight, Louis N. Ridenour and Bruno W. Augenstein	*Apr.*	55
Exploring the Depth of the Surface Layer of the Moon From a Radar Space Observatory, W. E. Fensler, T. B. A. Senior, and K. M. Siegel	*Nov.*	38
Regenerative Heat Sinks for Airborne Electronic Equipment, Alvin R. Saltzman, Bruno T. Plizak, Leonard F. Tomko, and James Nycum	*Dec.*	26
ESCAPE		
Crew Escape From Space Vehicles—and Survival, Hugo F. Mohrlock and Earl A. Kops	*Apr.*	79
Extending Capabilities of Escape and Aerial Delivery Systems, Fred B. Stencel	*Jan.*	47
FUELS		
Combustion of Elemental Boron, Claude P. Talley	*June*	37
Nuclear Radiation and the Thermal Stability of Jet Fuels, J. T. Guerin, J. G. Carroll, R. O. Bolt, and J. A. Bert	*Jan.*	27
GRAVITY		
Should the Laws of Gravitation Be Reconsidered? Part I—Abnormalities in the Motion of a Paraconical Pendulum on an Anisotropic Support, Maurice F. C. Allais	*Sept.*	46
Should the Laws of Gravitation Be Reconsidered? Part II—Experiments in Connection With the Abnormalities Noted in the Motion of the Paraconical Pendulum With an Anisotropic Support, Maurice F. C. Allais	*Oct.*	51
Should the Laws of Gravitation Be Reconsidered? Complementary Note, Maurice F. C. Allais	*Nov.*	55
GROUND EFFECT VEHICLES		
A Parameter for Comparing Ground Effect Vehicles, E. K. Liberatore	*Oct.*	33
INSTRUMENTS		
Achieving Extremely Accurate Nonfloated Gyros, A. W. Lane, M. S. Klemes, and E. L. Zeigler	*Jan.*	43

XUM

Automatic Range Prediction in Flight, Myron A. Hoffman and Harvey L. Pastan ... *Aug.* 47
Frequency Response Analysis of the Vane-Type Angle of Attack Transducer, G. J. Friedman ... *Mar.* 69
Measurement of Angular Acceleration in Aircraft and Missiles, Howard Stern ... *Nov.* 48
The Orbital Plane Interpreter, Harold E. Bamford, Jr. ... *Oct.* 37
Performance Criteria for Aircraft Localizer Guidance Systems During the Low Approach, Cecil C. Pine ... *Sept.* 43

MANAGEMENT

The Engineering Briefing—A Communication Medium, William R. Dunbar ... *Mar.* 60
Flight Into Space, Hollingsworth Franklin Gregory *Apr.* 37
The Growing Problems in the Space Program, H. Guyford Stever ... *Apr.* 40
Research and Development Management in the Aero/Space Age, Major Gen. M. C. Demler ... *June* 35
The Space Age Effect on Management, Edward A. Ledeen ... *Feb.* 29
Technical Management From Airplanes to Space Vehicles, Edgar Schmued ... *Apr.* 76

MATERIALS

Aeronautical and Space Applications for Ceramics, James D. Welterlen ... *Apr.* 72
Selection of Materials for Hypersonic Leading-Edge Applications, Frank M. Anthony and Harry A. Pearl ... *July* 40
Structural Interplay: Design and Materials, George Gerard ... *Aug.* 37
Thermal Shock Resistance—A Design Parameter for Ceramic Radome Walls, E. J. Luoma and E. B. Shand ... *June* 43
Transverse Shear Stiffness for the Double "V" Corrugated-Core Sandwich Panel, Alan D. Sapowith ... *Sept.* 53

METEOROLOGY

Model Precipitation Distributions, Edwin Kessler, III, and David Atlas ... *Dec.* 36

MISSILES

Three-Dimensional Satellite Orbits With Emphasis on Re-Entry Dynamics and Oblateness Effects, Jack N. Nielsen ... *Apr.* 60

NAVIGATION

Celestial Observations for Space Navigation, Lewis Larmore ... *Jan.* 37
Interplanetary Navigation by Optical Resection and Inertial Systems, Joel Carroll ... *Mar.* 53
Space Navigation and Exploration by Gravity Difference Detection, Joel J. Carroll and Paul H. Savet ... *July* 44

NECROLOGY

William L. Alford ... *Dec.* 18
Howard J. Bartleson ... *Nov.* 26
Col. William G. Brown ... *Mar.* 43
Karl H. Falk ... *Aug.* 14
Gerald E. K. Frayling ... *Nov.* 29
Hans R. Friedrich ... *Feb.* 60
Halton H. Friend ... *Apr.* 27
Jack Frye ... *Apr.* 27
Samuel A. Gordon ... *Feb.* 60
Frederick C. Hingsburg ... *June* 15
James B. Humphrey ... *Nov.* 29
Hugh P. Hunerwadel ... *Jan.* 15
Hugh C. Judge ... *Mar.* 43
Anatole M. Lambert ... *Jan.* 15
Paul W. Litchfield ... *May* 19
Lt. John C. McCoy, USN ... *Nov.* 29
Major Gen. Clements McMullen ... *Mar.* 43
Norton B. Moore ... *Feb.* 60
Robert A. Mowry ... *Oct.* 18
Roy H. Murray ... *Sept.* 26
Frederick W. Pruden ... *Feb.* 63
Commander Peter Rippa ... *Aug.* 14
1st Lt. William E. Shelton, Jr. ... *Nov.* 29
Gysbert C. Snyders ... *Apr.* 27
Sir Henry Tizard ... *Dec.* 18
Alpheus Holmes Walker, Jr. ... *Nov.* 29
A. R. Weyl ... *June* 15
Capt. Robert E. Williams ... *Apr.* 27
Lt. Col. Melvin E. Williamson ... *Aug.* 14
John Walter Wood ... *Feb.* 63
Paul B. Woyak, Jr. ... *May* 19
John E. Younger ... *Mar.* 43
Curt L. Zitza ... *July* 19

NOISE

Airborne Noise—Its Simulation and Effect on Components, Werner Fricke and Richard K. Kaminski ... *Dec.* 47

NUCLEAR

Nuclear Radiation and the Thermal Stability of Jet Fuels, J. T. Guerin, J. G. Carroll, R. O. Bolt, and J. A. Bert ... *Jan.* 27
Potentialities and Problems of Nuclear Rocket Propulsion, T. P. Cotter ... *Feb.* 50
Radiator Areas of Thermopile Generators in Space, Douglas L. Kerr ... *Sept.* 57

PROPULSION

Comparing Aircraft Engines by Mission Requirement and Aircraft Performance, E. William Beans *Jan.* 32
The Historical Development of Turbojet and Ram-Jet Engines in the Soviet Union, Donald J. Ritchie ... *Oct.* 45
Ion Rocket Engine Systems—A Summary, Robert H. Boden ... *Apr.* 67
Mineral-Free Water—A New Ground Service for Turbojets, Charles F. Raines ... *May* 53
Potentialities and Problems of Nuclear Rocket Propulsion, T. P. Cotter ... *Feb.* 50
A Practical Approach to Turbojet Engine Management and Trouble Shooting in Flight, Edwin F. Ayers and Philip D. Doran ... *Oct.* 40
Propeller Static Thrust, Ken S. Coward ... *Mar.* 64
Prophecy for Propulsion—One Man's Guess, T. F. Dixon ... *Feb.* 35
Space Applications for Rocket Vehicles, Everett T. Welmers ... *Sept.* 38
Why Free Turbines?, D. P. Edkins ... *Aug.* 58
Wind-Tunnel Tests of Shrouded Propellers and Their Application, Robert K. Wattson and Vernon O. Hoehne ... *July* 58

RELIABILITY

Aircraft Weapon System Reliability—A Quantitative Method of Establishing Requirements, Norman A. Benson ... *Dec.* 41
Reliability Testing Using Rotary Accelerators, Martin L. Aronow ... *May* 48
Specific Mortality of Engineering Devices, L. V. Toralballa ... *June* 41

RESEARCH

Combustion of Elemental Boron, Claude P. Talley *June* 37

ROCKETS

Ion Rocket Engine Systems—A Summary, Robert H. Boden ..... *Apr.* 67
Space Applications for Rocket Vehicles, Everett T. Welmers ..... *Sept.* 38

SAFETY

The Occurrence and Avoidance of Midair Collisions, Seymour J. Deitchman ..... *Jan.* 53

SIMULATION

The Development of Dynamic Flight Simulation, James D. Hardy and Carl C. Clark ..... *June* 48

SPACE FLIGHT

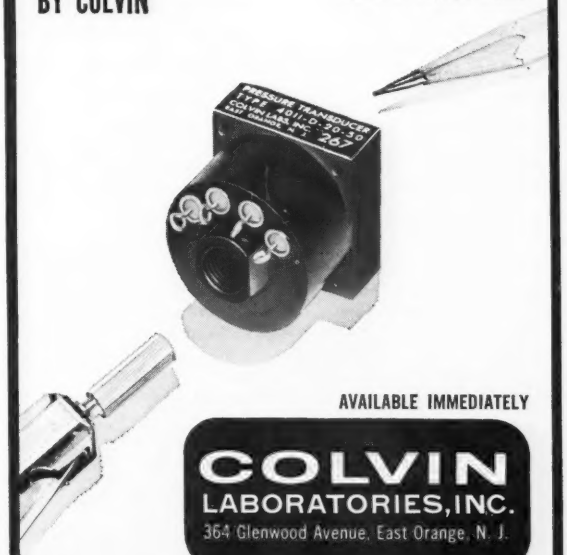
Aeronautical and Space Applications for Ceramics, James D. Welterlen ..... *Apr.* 72
Celestial Observations for Space Navigation, Lewis Larmore ..... *Jan.* 37
Crew Escape From Space Vehicles—and Survival, Hugo F. Mohrlock and Earl A. Kops ..... *Apr.* 79
Design of Large-Area Astronautical Objects, George A. Hoffman ..... *July* 48
The Earth and Inertial Space. Part I—Motions of the Earth, Richard H. Parvin ..... *Apr.* 34
The Earth and Inertial Space. Part II—Shape of the Earth, Richard H. Parvin ..... *May* 33
Electronic and Communications Aspects of Space Flight, Louis N. Ridenour and Bruno W. Augenstein ..... *Apr.* 55
Exploring the Depth of the Surface Layer of the Moon From a Radar Space Observatory, W. E. Fensler, T. B. A. Senior, and K. M. Siegel ..... *Nov.* 38
Flight Into Space, Hollingsworth Franklin Gregory *Apr.* 37
The Growing Problems in the Space Program, H. Guyford Stever ..... *Apr.* 40
Interplanetary Navigation by Optical Resection and Inertial Systems, Joel Carroll ..... *Mar.* 53
Ion Rocket Engine Systems—A Summary, Robert H. Boden ..... *Apr.* 67
The Pilot's Role in Space Flight, Charles B. Westbrook ..... *Nov.* 51
A Positive Approach to Man's Role in Space, D. T. McRuer, I. L. Ashkenas, and Ezra S. Krendel ... *Aug.* 30
Radiator Areas of Thermopile Generators in Space, Douglas L. Kerr ..... *Sept.* 57
Satellite Orbit Mechanics, Harry Esses ..... *Apr.* 48
Some Elementary Considerations Concerning Fringe of Space Environmental Conditions, Alex J. Moncrieff-Yeates ..... *Dec.* 32
Some Remarks on the National Space Program (*Editorial*), Louis G. Dunn ..... *Apr.* 33
The Space Age Effect on Management, Edward A. Ledeen ..... *Feb.* 29
Space Flight in the X-15, Clayton C. Clark, Jr. ..... *Apr.* 43
Space Navigation and Exploration by Gravity Difference Detection, Joel J. Carroll and Paul H. Savet ..... *July* 44
Technical Management From Airplanes to Space Vehicles, Edgar Schmued ..... *Apr.* 76
Three-Dimensional Satellite Orbits With Emphasis on Re-Entry Dynamics and Oblateness Effects, Jack N. Nielsen ..... *Apr.* 60
Trade-Off Considerations in the Design of Guidance Equipment for Space Flight, Charles J. Mundo, Jr. ..... *June* 31

STRUCTURES

Design of Large-Area Astronautical Objects, George A. Hoffman ..... *July* 48
Development of Aircraft Structure to Withstand

NEW MINIATURE PRESSURE TRANSDUCER BY COLVIN

- Only one inch square — one inch long
- Withstands high vibration
  35 G to 5000 CPS
  0-3 to 0-400 psi
  400 to 10,000 ohms



AVAILABLE IMMEDIATELY

COLVIN LABORATORIES, INC.
364 Glenwood Avenue, East Orange, N. J.

SOUTHWEST "Monoball"® SELF-ALIGNING BEARINGS

CHARACTERISTICS

	ANALYSIS	RECOMMENDED USE
1	Stainless Steel Ball and Race	For types operating under high temperature (800-1200 degrees F.).
2	Chrome Alloy Steel Ball and Race	For types operating under high radial ultimate loads (3000-893,000 lbs.).
3	Bronze Race and Chrome Steel Ball	For types operating under normal loads with minimum friction requirements.

Thousands in use. Backed by years of service life. Wide variety of Plain Types in bore sizes 3/16" to 6" Dia. Rod end types in similar size range with externally or internally threaded shanks. Our Engineers welcome an opportunity of studying individual requirements and prescribing a type or types which will serve under your demanding conditions. Southwest can design special types to fit individual specifications. As a result of thorough study of different operating conditions, various steel alloys have been used to meet specific needs. Write for Engineering Manual No. 551. Address Dept. ASE-59

SOUTHWEST PRODUCTS CO.
1705 SO. MOUNTAIN AVE., MONROVIA, CALIFORNIA

Acoustic Loads, Peter M. Belcher, Joseph D. Van Dyke, Jr., and Arthur L. Eshleman, Jr. ..... *June* 24
Hydro-Fatigue Test of a Large Cargo Aircraft, J. E. York ..... *May* 44
Selection of Materials for Hypersonic Leading-Edge Applications, Frank M. Anthony and Harry A. Pearl ..... *July* 40
Statistical Analysis of Seaplane Fatigue, Julius E. Pauken ..... *Nov.* 63
Structural Interplay: Design and Materials, George Gerard ..... *Aug.* 37
Thin Doublers for Fatigue-Resistant Aluminum-Alloy Structures, C. R. Smith ..... *Feb.* 40
Transverse Shear Stiffness for the Double "V" Corrugated-Core Sandwich Panel, Alan D. Sapowith ..... *Sept.* 53

SYSTEMS ENGINEERING

Aircraft Weapon System Reliability—A Quantitative Method of Establishing Requirements, Norman A. Benson ..... *Dec.* 41

TESTING—FLIGHT, EQUIPMENT

Design and Development of the Jet Exhaust Gas Scavenging System for the AEDC Propulsion Wind-Tunnel Facility, Carl J. Wenzinger .. *Nov.* 56
Flight Testing Experiments With the Tilt-Wing Aircraft, W. Z. Stepniewski and Paul J. Dancik .. *Feb.* 43
Hydro-Fatigue of a Large Cargo Aircraft, J. E. York *May* 44
Reliability Testing Using Rotary Accelerators, Martin L. Aronow ..... *May* 48
Wind-Tunnel Tests of Shrouded Propellers and Their Application, Robert K. Wattson and Vernon O. Hoehne ..... *July* 58

VTOL-STOL

Blown Flap System for STOL Performance—Weight Considerations, Milton Schwartzberg .... *Mar.* 48
Flight Testing Experiments With the Tilt-Wing Aircraft, W. Z. Stepniewski and Paul J. Dancik .. *Feb.* 43

Volume 1 Just Published

Advances in

SPACE SCIENCE

Edited by FREDERICK I. ORDWAY, III

Development Operations Division, Army Ballistic Missile Agency, Redstone Arsenal, Alabama

Editorial Advisory Board:

WERNHER VON BRAUN
FREDERICK C. DURANT, III
EUGEN SÄNGER
LESLIE R. SHEPHERD
GEORGE P. SUTTON
ÉTIENNE VASSY

Volume 1

CONTENTS: November 1959, 413 pp., illus., approx. $12.00

Power Supplies for Orbital and Space Vehicles
By JOHN H. HUTH, The RAND Corporation
Manned Space Cabin Systems
By EUGENE B. KONECCI, Douglas Aircraft Company, Inc.
Interplanetary Rocket Trajectories
By DEREK LAWDEN, University of Canterbury
Interplanetary Communications
By J. R. PIERCE and C. C. CUTLER, Bell Telephone Laboratories
Radiation and Man in Space
By H. J. SCHAEFER, U. S. Navy School of Aviation Medicine
Nutrition in Space Flight
By ROBERT G. TISCHER, Mississippi State University
Appendix: A Decimal Classification System for Astronautics
With an introduction by HEINZ HERMANN KOELLE, U. S. Army Ballistic Missile Agency
AUTHOR INDEX—SUBJECT INDEX.

Volume 2

TENTATIVE CONTENTS: April 1960

Materials in Space
By FREDERICK L. BAGBY, Battelle Memorial Institute
Fundamentals of Astrodynamics
By ROBERT M. L. BAKER, JR., and MAUD W. MAKEMSON, University of California, Los Angeles
Plasma Propulsion Devices
By MORTON CAMAC, Avco Research Laboratory
Tracking Artificial Satellites and Space Vehicles
By KARL G. HENIZE, Smithsonian Institution Astrophysical Observatory
Inertial Guidance and Other Guidance Systems Applicable to Space Travel
By CHARLES J. MUNDO, JR., American Bosch Arma Corporation
Attitude Control of Satellites and Space Vehicles
By ROBERT E. ROBERSON, Systems Corporation of America
Experimental Physics Using Space Vehicles
By CHARLES P. SONETT, Space Technology Laboratories, Inc.
Electrostatic Propulsion Systems for Space Vehicles
By ERNST STUHLINGER and ROBERT N. SEITZ, U. S. Army Ballistic Missile Agency
AUTHOR INDEX—SUBJECT INDEX.

Other Noteworthy Books

HYPERSONIC FLOW THEORY
By WALLACE D. HAYES and RONALD F. PROBSTEIN
1959, 464 pp., illus., $11.50

INTRODUCTION TO ROCKET TECHNOLOGY
By V. I. FEODOSIEV and G. V. SINIAREV
Translated from the Russian by S. N. SAMBUROFF
November 1959, 344 pp., illus., $9.50.
